

PUSHPRAJ SINGH BHATI

Senior Full-Stack Developer | Angular | .NET Core | SQL Server | AWS

Ahmedabad, India | +91 79878 04424 | pushprajbhati2164@gmail.com | linkedin.com/in/pushprajsinghbhati

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with nearly 4 years building production web applications in Angular, TypeScript, C#, .NET Core and SQL Server. Promoted from Frontend Developer to Senior Programmer in 17 months, then to Project Manager & Lead Engineer, leading a team of 4 while staying hands-on. Designed the region-aware architecture behind Noosom (6 regions, 3 SQL Server databases on AWS) and built its media pipeline, real-time layer and global payments. Turns business requirements into specs and ships features end to end.

TECHNICAL SKILLS

Frontend: Angular 12+, TypeScript, JavaScript, RxJS, HTML5, SCSS, Bootstrap, Responsive Design, LightGallery

Backend: C#, .NET Core, ASP.NET Core Web API, RESTful API Design, SignalR, WebSockets, JWT Authentication

Database: SQL Server, T-SQL, Entity Framework Core, SSMS, Multi-Database and Region-Based Data Distribution

Media and Performance: Bunny CDN, FFmpeg, TUS Resumable Uploads, Image/Video Processing, Metadata Extraction, Brotli, Gzip

Payments and Integrations: Stripe, Cashfree, Apple In-App Purchases, Google Maps API, Google Drive, Dropbox

Architecture and Leadership: AWS (multi-region hosting), Multi-Region Architecture, SDLC, Technical Design, Code Review, Sprint Planning, Task Delegation, Technical Documentation

Tools: Git, SVN, Visual Studio, VS Code, Postman, Figma

PROFESSIONAL EXPERIENCE

Noosom Private Limited (formerly Mission Dev India Private Limited)

Ahmedabad, India

Product: Noosom (noosom.com), a personal life-story platform | Nov 2022 - Present

Project Manager & Lead Engineer

Aug 2025 - Present

- Lead a **4-member engineering team** through sprint planning, task allocation and code review, while staying hands-on in Angular and .NET Core.
- Turn business requirements into technical specs and implementation plans, taking features from analysis through development, testing and production release.
- Designed a region-aware architecture on AWS (UK, US, Asia): **6 regions served from 3 SQL Server databases**, with a central GlobalUserId identity model and one shared codebase.
- Built a centralized Admin Panel so management can run users, master data, payments, dashboards and product configuration without developer help.
- Integrated Cashfree (India), Stripe (international) and Apple In-App Purchases (iOS), designing payment flows around App Store rules and using Apple startup program benefits to lower platform costs.

Senior Programmer (Full-Stack: Angular + .NET Core)

Apr 2024 - Jul 2025

- Cut media load times by about **60%** and ended browser freezes with thousands of images and videos, using **Bunny CDN** caching, image processing (sharpen, face focus, thumbnails, compression) and Brotli/Gzip compression.
- Replaced Syncfusion with a custom **Media File Manager** (file and folder operations, bulk actions, previews, search, 50-60 metadata fields), saving about **INR 1 lakh per month** in licensing.
- Built a **TUS resumable upload** system for large files with chunk retry, pause and resume, speed and ETA, progress tracking, and background cleanup of orphaned chunks.
- Built an FFmpeg pipeline that converts unsupported image, video and audio formats into web-compatible ones at upload, so media plays on every device.
- Built a SignalR and WebSocket layer for chat, comments, live indicators and notifications, replacing API polling and reconnecting automatically.
- Delivered end-to-end features across Angular UI, ASP.NET Core Web APIs, Entity Framework Core and SQL Server, including complex forms, validation and CRUD workflows.

Frontend Developer

Nov 2022 - Mar 2024

- Built the Noosom web app in Angular from Figma designs: responsive, reusable UI, complex forms and dashboards with Bootstrap and SCSS.

- Added location features with Google Maps API and Google Drive and Dropbox integrations delivered through CDN.
- Moved into full-stack work by building .NET Core APIs alongside Angular features, earning promotion to Senior Programmer in 17 months.

ADDITIONAL EXPERIENCE

Sales Manager | Bajaj Allianz General Insurance **Jul 2022 - Oct 2022**

- Managed client relationships and built stakeholder communication and resilience skills before moving into software engineering.

EDUCATION

Post Graduate Diploma in Computer Applications (PGDCA), with Honours 2022
Bachelor of Engineering, Information Technology | Oriental College of Technology (RGPV), Bhopal 2019

LANGUAGES

English (Full Professional Proficiency), Hindi (Native)
